EXPERIENCE

Applications Developer,
Marsh & McLennan Companies
June 2019 - Present

Working with multidisciplinary teams in order to build solutions to issues using the React environment while also developing and maintaining mobile apps that operate as tools for colleagues within the company. We prioritize effective UI/UX design in order to provide accessibility to all users.

Intern,
Marsh & McLennan Companies
May 2017 - June 2019

Maintained and improved legacy applications built using PHP, jQuery, and Javascript through refactoring and by introducing new functionality. Adopted and continued the development of pages built using GatsbyJS.

Teacher's Assistant,
Stevens Institute of Technology
September 2016 - January 2017

Instructed students during recitation periods on the basics of C++ syntax/computer science while also grading assignments, exams, and projects.

Intern,
iThreat Cyber Group
May 2016 - August 2016

Developed a network operations center using PHP, SQL, and Javascript that routinely monitored and reported the status of devices and servers within the company.
